Our DR-2580C desktop workgroup scanner is hungrier than any other scanner.

It devours documents at 25 pages per minute for black and white or greyscale and 13 pages for colour. Everything from bite-sized plastic cards to substantial slivers of paper. Even bound documents and books are on the menu, when the DR-2580C is combined with the optional flatbed attachment.

Simply load it and leave it to do the job.

DR-2050C

DR-2580C

Despite having an ultra slim body, our latest workgroup scanner has a massive appetite.

The DR-2050C devours documents at 20 pages per minute for black and white or greyscale and seven pages for colour – and scans them with perfect precision. Everything from bite-sized business cards to substantial slivers of paper. Simply load it and leave it to do its job.
